

WORKFORCE DEVELOPMENT SPOTLIGHT

The DC Sustainable Energy Utility ([DCSEU](#)) is a strategic partner of [DC Green Bank](#), which aims to save District residents, businesses, and institutions money and energy through a variety of programs. **Twice a year, the DCSEU offers a five-month PAID externship where DC residents are given the opportunity to receive on-the-job training and certifications within the [green economy](#).** Additionally, externs will receive free professional development trainings and job placement assistance for the duration of the program.

85% of externs go on to full-time positions in fields such as:

- o Administrative Assistant
- o Building Maintenance
- o Electrical Engineer
- o HVAC Technician
- o Mechanical Engineer
- o Program Assistant
- o Project Assistant
- o Solar Technician

To see how some of the former graduates have gone on to have successful careers upon completion of the program, you can read their stories [here](#).

LOCATION

1 M St SE 3rd floor, Washington, DC 20003

All externs report to the DCSEU headquarters once a week, located in the Navy Yard district of Washington DC, for professional development. There, they are able to enhance their resume with a multitude of green learning courses, earning a variety of credentials along the way. For the rest of week, all externs report to a job site at a local contractor or organization within the green workforce.

QUALIFICATIONS

The DCSEU welcomes all District residents who are either new to the workforce, recent graduates, between jobs, or looking for a career change to apply for their workforce development program. The DCSEU encourages applicants interested in DC's green economy to apply. **NO EXPERIENCE REQUIRED.**
